

CPSS Video Monitoring

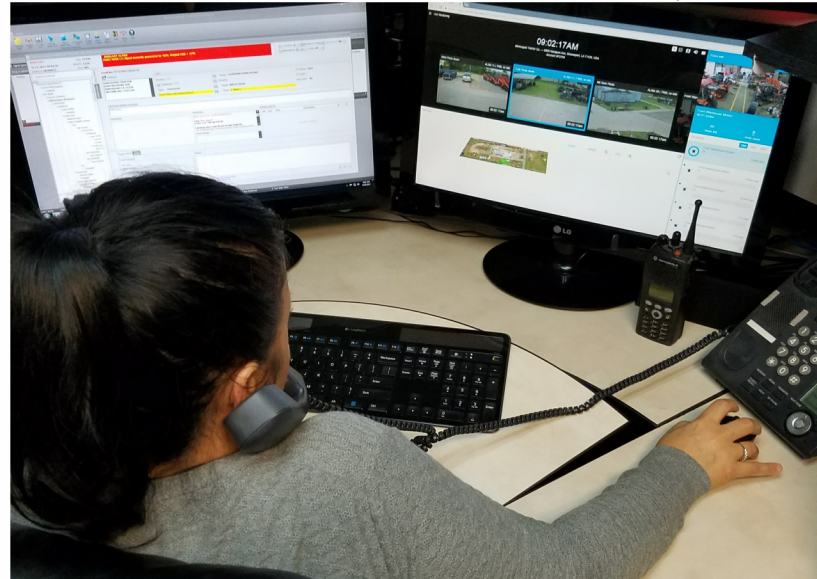

FL LIC#EF0000424, EF20001021

You choose a security provider to provide the best possible service at potentially your worst moment.

Video Monitoring allows our operator the ability to immediately see and understand what is happening at your location...information that is vital to getting the police there quickly and apprehending the intruder.

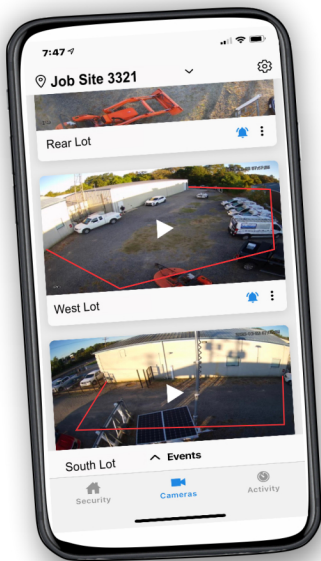

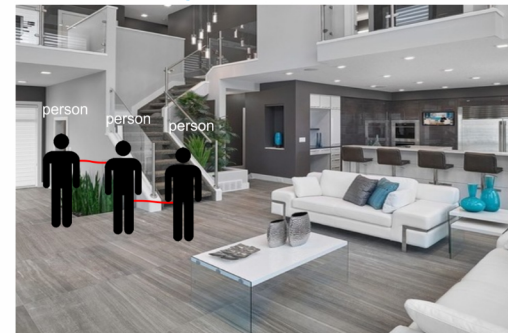

Our Mobile App allows you the freedom to utilize your camera system as needed during the day and/or to verify any behavior that our operator is unsure about when your system is armed.

For your BUSINESS

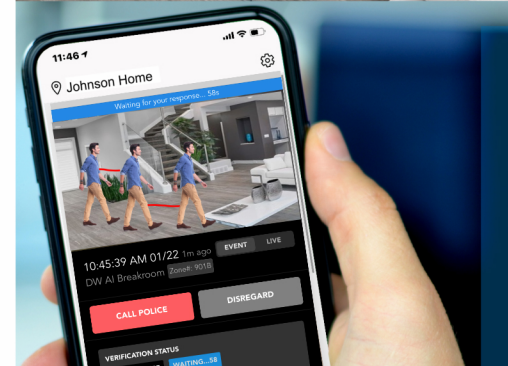

We will design your system so that we can move the perimeter away from your home or business so that intruders are detected **before** they can remove valuables or damage your site.

What our Operator sees

For your HOME

Privacy mode allows the home-owner to utilize cameras inside the house to watch over a loved one or pets without the fear that anyone is able to view that camera without your consent, protecting not only your home but your privacy.

What You See

Our technology may be compatible with your existing camera system. Let us improve your experience with the power of A.I.

Don't just react to a theft that costs you time and money - be **PROACTIVE** with our Intelligent Cameras and Video Monitoring.

Call us today at **800-949-1799** or visit **www.CPSS.net/AI** to learn more.
